Achievements/Tasks

- Currently undergoing training in Python, Statistics, Machine Learning, SQL, MongoDB, and Data Visualization.
- Working on hands-on projects and real-world datasets.
- Regularly solve coding challenges on HackerRank to strengthen problem-solving and programming skills.
- Understanding of Artificial Intelligence and Machine Learning concepts.
- Experience using Python libraries such as Jupyter Notebook and Numpy.
- Knowledge of supervised and unsupervised learning techniques.

PERSONAL PROJECTS

CUSTOMER CHURN PREDICTION IN BANKING USING FEDERATED LEARNING

- Developed a privacy-preserving machine learning model using federated learning to predict customer churn in the banking sector, improving prediction accuracy and supporting retention strategies.
- Implemented Federated Learning to train models across distributed datasets while preserving customer privacy and data security.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.

E-Book Platform

- Developed & designed a full-stack e-book platform using HTML, CSS, & JS.

ARDUINO-POWERED INTELLIGENT PARKING MANAGEMENT SYSTEM

- Designed and implemented a smart parking system using Arduino to monitor real-time slot

CERTIFICATES

Python for Beginners (Infosys Springboard Online).

Java Programming Fundamentals (Infosys Springboard Online).

Programming Skill In C(Infosys Springboard Online).
